- By Cheque** - Cheques payable to : Atlantic Hockey Group
- Credit card** - If paying by credit card, please complete the information required on the application form.

SKATING on the EDGE is a skating development program which covers the techniques for maximizing speed on the ice while maintaining control at all times. It encompasses every aspect of skating necessary to develop into a more effective and valuable hockey/ ringuette player, pleasure skater or anyone wanting to improve their skating.

Unfortunately skating remains the most neglected skill for a hockey or ringuette player due to the fact that players have so much to think about in a game including stick handling, passing, shooting, body checking and more, that they have little time to think about proper skating technique or how to react on skates to unexpected situations or sudden body checks. A player's skating ability must be honed so sharply that their reactions become instinctive and by nature second hand.

Remember, **HARD WORK AND PROGRESS ARE INSEPARABLE!** The end result of all your efforts will be Skating with **BALANCE, AGILITY and MOBILITY.**

HEAD INSTRUCTOR

Lloyd Watling, a native of Miramichi, brings over 29 years of experience in skating development. He began working with the Newcastle Figure Skating Club as well as working with the CFSA's Can Skate program focusing on working with the younger hockey players. With his move to Moncton, Lloyd quickly became involved with minor hockey as well as becoming a certified CFSA Can Skate Power Skating instructor. The natural progression was the

establishment of BAM(Balance, Agility, Mobility) Skating on the Edge program.

Over the last 30 years BAM has helped develop better skaters from the IP to Major Junior players. An Instructor, rather than a coach, Lloyd prides himself on studying the science of skating and developing simple drills to develop skating skills that can be used at an initiation level as well as using the same drills at a quicker pace for Major Junior players.
